

Brentford Waterside

design for change workshop.

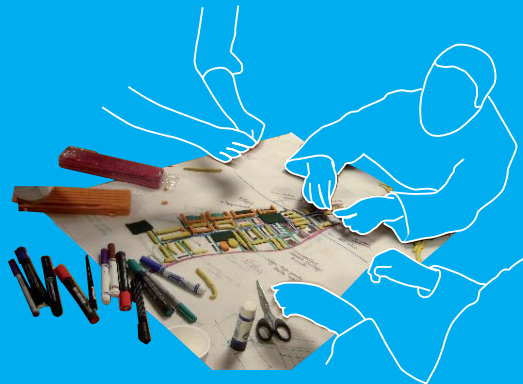

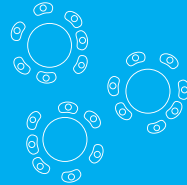

Purpose of Drop-in Design Event:

An opportunity to help design Brentford's waterside

Brentford is a fantastic place with a rich heritage and unique relationship with water. Unfortunately the town has recently struggled with the decline of the High St and continued uncertainty over the future of vacant sites in and around the town centre. The community's award winning Vision for the High Street and the Council's Area Action Plan lay the foundations for a future sustainable community. ISIS, as one of the key landowners in the town (Commerce Rd area), would like to help contribute to the community's Vision for Brentford and its waterways. We would really appreciate some of your time to help design proposals for the waterside areas which support the town centre and the community's ambitions for Brentford.

Please drop-in to Grounds Cafe on Thursday 1st October 2009, between 5.30pm-9.00pm to help design the future of Brentford's waterside.
